EXPERIENCE

CTO, *Stealth Startup*

September 2025 - Present

- Led development of a configurable e-commerce platform with dynamic product customization, storefront management, and administrative tooling.
- Streamlined platform architecture and management workflows by reducing configuration complexity and consolidating redundant systems.
- Built reusable UI systems for dynamic branding, layout configuration, and real-time storefront state synchronization.

Contractor, *Wolf Game: Caves* (via Linc Web Tech LLC)

October 2025 - November 2025

- Built a configurable leaderboard and rewards system with admin tooling, backend validation, and concurrency-safe database migrations.
- Built polished, animation-driven UI systems for gameplay and reward experiences, combining responsive design, custom motion, sound integration, and synchronized UI state management.
- Stabilized core gameplay state systems by fixing session, inventory, and action-handling issues while improving animation synchronization and gameplay mechanics.

Contractor, *InfiniGods*

February 2024 - May 2024

- Led the mobile Marketplace UI overhaul for InfiniGods's King of Destiny platform, translating high-fidelity Figma mocks into pixel-perfect responsive implementations across mobile devices.
- Contributed to Marketplace launch readiness by implementing backend-controlled feature toggles and assisting with debugging and production issue resolution.

Software Engineer, *InfiniGods*

May 2024 - January 2025

- Architected the front-end codebase for InfiniGods' Valhalla Foundations platform, establishing scalable patterns and reusable architecture for a highly interactive gamified experience.

SKILLS

React(5)

CSS(5)

Git(5)

SCSS(4)

Tailwind CSS(4)

Figma(4)

Node(4)

Express(4)

MongoDB(4)

Adobe Illustrator(4)

React Native(4)

jQuery(3)

JWT(3)

GraphQL(3)

Python(3)

Bootstrap(3)

Photoshop(3)

WordPress(2)

Apollo(2)

AWS(2)

C++(2)

Java(2)

PHP(2)

SQL(2)

- Led UI development across the platform, delivering pixel-perfect responsive interfaces and polished interactions from high-fidelity design mocks across desktop, mobile, and ultra-wide layouts.
- Implemented complex NFT staking systems and UI/UX flows, including multi-vault staking, overclock mechanics, live bonus countdowns, staking statistics, and multi-wallet crypto interactions.
- Developed reusable SCSS systems and polished, animation-driven user experiences that improved development efficiency, responsiveness, and overall platform immersion.

Senior UI Developer, *InfiniGods*

January 2025 - April 2025

- Updated Marketplace and Webstore UI/UX for the God Coin launch, adapting purchasing flows and digital content experiences to support the new currency..
- Built dynamic, animation-driven purchase experiences for King of Destiny packs, including interactive reward modules, paginated pack information popups, and product-controlled content visibility.
- Implemented responsive legal and informational pages for Valhalla Foundations from high-fidelity Figma mocks, accurately reproducing complex formatting, links, lists, and document styling.

Application Developer, *Pet Social LLC*

January 2023 - February 2024

- Maintained/improved React Native iOS application Furbles while utilizing Neo4j, GraphQL, Apollo, Express, Node, GraphQL-Neo4j
- Developed responsive user interfaces and core social platform features, including instant messaging, comment replies, media uploads, notifications, follower systems, mentions, and animated page transitions.
- Built internal moderation/admin tooling across web and mobile platforms, implementing advanced filtering, pagination, Apollo cache management, and content moderation workflows.
- Contributed to application stability and release quality through debugging, feature refinement, end-to-end testing, and Agile sprint development using Jira.

University of Oregon, Eugene, OR — *B.S. Computer Science*

Summer 2017

- Studied object oriented programming, algorithms, data structures, software methodologies, operating systems, etc.
